- **Tools & Technologies:** Git, Postman, API Integration, Performance Optimization

## PROFESSIONAL EXPERIENCE

---

### Walrus Tech

Frontend Developer & Team Lead

Jan 2025 - Present

Benin City, Nigeria

- Managed a team of three developers to deliver a multifunctional app integrating car rental, artisan services, and a chatroom using React and Node.js, demonstrating effective communication and leadership.
- Designed and developed responsive landing pages with a focus on HTML, CSS, and performance optimization to enhance user experience.
- Collaborated remotely with backend and mobile developers to integrate APIs and ensure cohesive functionality across platforms.
- Coordinated milestone setting and troubleshooting of performance bottlenecks to ensure the timely release of high-quality features.

### Standard Life Organization

Frontend Developer

Jun 2024 - Dec 2024

Benin City, Nigeria

- Engineered and maintained web applications using React and Next.js while leveraging responsive design principles and scalable frontend solutions.
- Implemented a core banking system by integrating external REST APIs for real-time data processing, aligning with best practices for frontend development.
- Partnered with UX/UI designers to refine interface usability and resolve bugs, thus ensuring optimal user experiences.
- Enhanced frontend code performance to reduce load times and improve multithreading efficiency.

### Self-Employed

Freelance Software Developer

Jun 2022 - May 2024

Remote

- Built a dynamic e-commerce platform for Frima-Tech using Next.js, NextAuth, and Paystack, ensuring secure authentication and seamless payment integration.
- Developed a booking system for Linos-Touch with JavaScript, PHP, and MySQL, incorporating Stripe for payments and optimizing for offline storage.
- Created a school management system with Laravel, featuring automated grading and real-time communication tools, enhancing user accessibility.

### Pure Access IT LTD

Contract Software Trainer

Oct 2019 - Feb 2020

Abuja, Nigeria

- Trained aspiring developers in JavaScript, HTML, and CSS, fostering practical skills through hands-on projects.
- Mentored junior developers, guiding them in debugging and optimizing web applications for better performance.

## EDUCATION

---

Auchi Polytechnic, Auchi, Edo State, Nigeria

Higher National Diploma (HND), Computer Science

2017

## SELECTED PROJECTS

---

### E-Commerce Platform

Frima-Tech

- Built a scalable e-commerce site with Next.js, integrating Paystack for payments and NextAuth for secure user authentication.
- Optimized for speed and responsiveness.

## **Booking System**

### *Linus-Touch*

- Developed a booking platform using JavaScript and PHP, with Stripe integration and offline storage capabilities for reliable performance.

## **Booking System**

### *Linus-Touch*

- Revamped booking platform using Next.js and, with Stripe integration and offline storage capabilities for reliable performance.
